

The **Mogadore Canoe-O** was held at 1 pm on July 19th, the weather was mostly sunny and in the mid 70's with a slight breeze. The event followed a 2 hour score format with a maximum of 890 points. There were 25 mapped controls, and one mystery control with location and specific control punching instructions given at another control. Due the ambiguity about the instructions, everyone finding the control was given its assigned points.

Turn out was good with 30 registered teams. The most prevalent watercraft was canoes. The boat house had a stellar day, renting all the canoes, and overflow participants used rowboats.

The course was set to include the option of either by water, by land or a combination of those routes. In fact, in a canoe-O the option exists for a team to split up as one goes overland and collects controls, while the other paddles to a rendezvous point as a course strategy.
