31	170	?	43	?

As you can see (except for phone net members, since there hasn't been a NJPN bulletin since LAST December!), totals were down substantially in Nov. from the past month's totals. Most of this drop off can be laid at the feet of the very poor band conditions we experienced during November. Hopefully, December, with its "big traffic month" image, will not only bring more traffic, but also some better band conditions. Remember, nothing helps our nets like traffic and December is a good time to send Seasons Greetings to friends and relatives far away.

QNI HONOR ROLL

The lists which follow are those of stations in NJN, NJPN, and NJSN who persevered through the horrendous November conditions above and beyond the call of duty. Criteria are as follows: NJN- 20 or more QNI in either the late or early session during the month; NJPN and NJSN- 10 or more QNI during the month. The number following each call indicates how many times that station QNIed the indicated net---according to our records!

ANNOUNCEMENTS

BAND CONDITIONS

"Band conditions in the past month have been nothing short of horrible. This is particularly tough on the novices as one can only do so much as a beginner and limited to 75 watts. Incidentally, NJSN has gone from 337 QNI in September to 170 QNI in November. The only thing that changes that quickly is the band. However, we must take the bull by the horns and make the best of the situation. It's very frustrating not even hearing the net on some nights, but hang in there and keep on trying. We'll be back to the summer QRN before we even know it."--WB2RMC

"As I see it, the solution to the phone net dilemma is to move to Northern Florida."--WB2RMC (Seriously, this is an excellent time to sharpen up our receiving skills and patience).

SIMULATED EMERGENCY TEST

This year's Simulated Emergency Test (SET) will held January 24-25. All NJ nets will participate in this event, which will:

1. Make us aware of our strengths and weaknesses as they apply to emergency operations.
2. Provide experience in handling traffic under simulated emergency conditions using proper procedure.
3. Demonstrate our usefulness in emergency situations to the public and to served agencies (Red Cross, etc.).
