We've entered the digital age of photography and I've decided to share all the advantages of digital photography with my clients. Instead of restricting your ability print and share your wedding photos with watermarks and low resolution files, your final images are delivered on a DVD with no copyright protection. This can save you hundreds of dollars on reprints and enlargements. You can have your images printed at any lab of your choice, you can post them on the web, scrapbook, or manipulate you images on your own computer. Of course if you want professional printing you can order prints directly from me. Your wedding photographs will also posted online so you can share them with friends and family anywhere in the world.
