There's a 1 in 79 chance that all six of the Super Lotto numbers will be odd numbers

There's only a 1 in 325,205 chance that all six of the Super Lotto numbers will be consecutive numbers.

There was a real snafu concerning the March 5, 2005 Super Lotto results.

One or more unscrupulous Ohio Lottery employees published the information incorrectly for that day's drawing. The correct numbers were 7, 9, 26, 27, 34, and 35; with the Bonus Ball being 37. The published information was 7, 9, 26, 27, 34, and with the Bonus Ball being 37. The news report said that the error was discovered and corrected on the following Monday. Supposedly the person or persons involved were disciplined. (The report did not specify if the error was made intentionally or by accident.)
